Note the following from me as z citizen;

## 1. Common toll.

(a) Needs updating using NID to ensure we vote once from where ever we are. Just like the ATM, we cannot trick the machine and withdraw the same amount elsewhere again, a similar system must be designed and that's easy.

(b) Where common roll update had not been done well enough, allow all citizens to vote the same day; even into the night if all present had not voted (Avoid repeat voting next days).

## 2. Security

Outside volunteer teams leading and overseeing would be better if we have funds to avoid conspiracy

## 3. Election management

Volunteers from abroad would be better to maintain transparency

## 4. Expenditure

Spend enough to ensure final results; i.e. avoid disputes & courts & of course by election is a waste of tax payers' money.

Hope the committee take these or some of it into account.
